

NAME	What was being tested	nature of failure	error in code	steps to fix error
login1	Test that login transaction is accepted.	SUCCESS	SUCCESS	SUCCESS
login2	Test that no other transaction is accepted before login.	SUCCESS	SUCCESS	SUCCESS
login3	Test that we can login as admin.	spelling error	spelling mistake in .inp and wrong credit for admin	fix the spelling error and make sure the credit is right for admin
login4	Test that we can login as full standard	SUCCESS	SUCCESS	SUCCESS
login5	Test that we can login as buy standard	SUCCESS	SUCCESS	SUCCESS
login6	Test that we can login as sell standard	spelling error	used capital "L" for login	system is case sensitive make sure there are no mismatch for inputs
logout1	Test that we are logged in before logout.	SUCCESS	SUCCESS	SUCCESS
logout2	Test that we can only login after logout.	SUCCESS	SUCCESS	SUCCESS
logout3	Test that Daily Transaction File is correctly written out.	SUCCESS	SUCCESS	SUCCESS
create1	Test privileged transaction when logged in as admin.	SUCCESS	SUCCESS	SUCCESS
create2	Test maximum credit is 999,999.99.	code error	no input after the amount of credit to add	addCredit.cpp and logout.cpp fix I/O handler
create3	Test username character limit is 15.	SUCCESS	SUCCESS	SUCCESS
create4	Test username is unique/different from other usernames.	SUCCESS	SUCCESS	SUCCESS
create5	Test type of user.	SUCCESS	SUCCESS	SUCCESS
create6	Test information saved into daily transaction file.	SUCCESS	SUCCESS	SUCCESS
delete1	Test username exists but not current user.	SUCCESS	SUCCESS	SUCCESS
delete2	Test no further transactions should be accepted on deleted user's available inventory.	SUCCESS	SUCCESS	SUCCESS
delete3	Test user account is removed and all items for sale are cancelled.	wrong output in the etf	user06 instead of user08	fix the .inp file or the .etf
delete4	Test privileged transaction when logged in as admin.	SUCCESS	SUCCESS	SUCCESS
delete5	Test information saved into daily transaction file.	SUCCESS	SUCCESS	SUCCESS
advertise1	Test user account type access to sell.	I/O	wrong output to dtf in logut.cpp	use the correct variable users.days left and users.credit
advertise2	Test max price	I/O	wrong output to dtf in logut.cpp	user.credit does not refer to the right variable input
advertise3	Test item name is max 25 characters	SUCCESS	SUCCESS	SUCCESS
advertise4	Test max number of days item is for sale	I/O	right input but wrong output to the dtf the comparison fails	user.daysleft refers to the item rather than the advertised
advertise5	Test no further transactions should be accepted on a new item for sale until the next session.	file I/O to dtf	wrong input due to spelling mistake	fix spelling mistake
bid1	Test information saved into daily transaction file.	SUCCESS	SUCCESS	SUCCESS
bid2	Test semi-privileged transaction when not logged in as standard-sell.	SUCCESS	SUCCESS	SUCCESS
bid3	Test new bid is at least 5% higher than previous bid for all except admin.	missing requirements	check for new bid to be 5% higher thab previous bid	implement that requirement
bid4	Test item name exists.	SUCCESS	SUCCESS	SUCCESS
bid5	Test new bid is greater than previous bid.	input file error	missing variables for bid	add in the number of days and make sure the .etf is outputting correctly
refund1	Test credit goes from seller to buyer done by admin only.	SUCCESS	SUCCESS	SUCCESS
refund2	Test buyer and seller username exist.	SUCCESS	SUCCESS	SUCCESS
refund3	Test information saved to daily transaction.	SUCCESS	SUCCESS	SUCCESS
refund4	Test asking for buyers username, sellers username, and amount of credit to transfer.	SUCCESS	SUCCESS	SUCCESS

addcredit1	Test in admin amount of credit is added.	SUCCESS	SUCCESS	SUCCESS
addcredit2	Test maximum of \$1000.00 can be added.	SUCCESS	SUCCESS	SUCCESS
addcredit3	Test in admin username exists.	SUCCESS	SUCCESS	SUCCESS
addcredit4	Test in standard account amount of credit is added.	SUCCESS	SUCCESS	SUCCESS
addCredit5	Test information saved to daily transaction.	wrong I/O to etf and atf	variables did not output to the . atf	fix code in addCredit.cpp to make sure output for dailyTransactionFile.atf works
addCredit6	Test credit is inputted as numbers not words.	SUCCESS	SUCCESS	SUCCESS
